

TODAY'S REALITY

Technology is outpacing our ability to secure it. Despite substantial spending on legacy security products, advanced attackers are bypassing these defenses at will and spreading unchallenged.

There's no single technical answer. There's no legislative fix. Bad guys will always exist, and determined attackers will always innovate.

53%

of victims learn they are breached from a third party

100%

of victims have up-to-date anti-virus signatures

46%

of compromised systems had no malware on them

ONE UNITED DEFENSE

AGAINST CYBER ATTACKS

OUR APPROACH

Organizations are looking for a strategic defense partner to protect them over the long haul. This partner must be able to innovate as fast as attackers — and adapt as customers' needs grow. It isn't about "outsourcing" security. It's about investing in the knowledge and expertise of a company that is 100% focused on detecting, analyzing and resolving today's threats.

Organizations want a partner that can help them go from alert to fix in minutes and scale service up or down as threats and needs evolve. They need a single vendor that can help simplify and streamline their infrastructure — one trusted resource they can rely on for technology, intelligence, and expertise to forge a unified defense against cyber attackers. This is the FireEye approach.

WHAT WE DO

FireEye helps you create efficient security operations that protect your most valuable assets from those who mean you harm. FireEye shows you how you can proactively plan for attacks and detect them as they occur. We provide nation-grade intelligence so you can understand your risks and prioritize them. And we give you the tools and support you need to quickly contain, analyze and resolve incidents.

HOW WE DO IT

FireEye applies a unique blend of technology, intelligence, and expertise to protect the FireEye Global Defense Community of more than 4,700 customers across 67 countries.

TECHNOLOGY

Our patented Multi-Vector Virtual Execution (MVX) architecture connects the dots across all vectors of an attack and analyzes threats across hundreds of combinations of operating systems, apps, software versions and more.

INTELLIGENCE

We offer victim, machine-based and adversary intelligence from incident response cases, auto-generated data from millions of network and endpoint sensors and the tracking of over 16,000 threat actors by analysts across all continents.

EXPERTISE

Our consultants and analysts have refined their technical and forensics skills over the course of hundreds of investigations. We help you resolve incidents quickly and prepare for tomorrow's attacks.

THE VALUE OF FIREEYE

By catching an incident early, security teams can reduce the overall impact — costly fixes, disrupted business, stolen intellectual property, and tarnished reputations. FireEye can meet your organization's unique and changing needs with a tailored mix of technology, intelligence, and expertise.

DECIDE WHICH ATTACK VECTORS YOU WANT TO COVER

We protect you with our innovative MVX technology, which scales with you as your needs evolve. Whether you are looking to enhance your network or endpoint defenses—or get visibility across all attack vectors—we can help you.

DETERMINE WHAT YOU WANT TO KNOW ABOUT YOUR ATTACKER

Whether you're just looking to detect attacks or want to understand who is attacking you and why, we can help. Our intelligence helps you understand the risks of each threat and prioritize your response.

DECIDE HOW YOU WANT TO BE PROTECTED

Whether you need another set of eyes or want our experts to actively hunt for attackers in your environment, we have a range of options to help you manage your defense. We'll tell you when you have an incident and what to do about it. And we're on standby if you ever need us to help respond.

OUR SOLUTIONS

TECHNOLOGY

- Network
- Email
- Endpoint
- Mobile
- Content
- Analytics
- Forensics
- Orchestration and Integration

INTELLIGENCE

- Standalone iSIGHT Intelligence
- Intelligence integrated into FireEye products
 - Dynamic Threat Intelligence
 - Advanced Threat Intelligence
 - ATI+

EXPERTISE

- Incident Response
- Security Assessments
- Consulting Services
- Technical Support
