Adapting Attacks

More cyber criminals are using email in a variety of ways to bypass security tools. Malicious attachments have been replaced with malicious websites and third-party files.

With email security solutions focused on detecting malware, cyber criminals are adapting their attacks, exposing organizations to malware-less assaults such as CEO fraud.

1/101

to infiltrate your organization.

Email campaigns can target up to 10% of users, making them a prime target for cyber attackers.

Ransomware damages reached $6 billion in 2017.
