1 Endpoint Security Agent software versions 25.12.1 and 25.12.2

2 Endpoint Security Agent software versions 24.9.0, 24.9.3, and 24.9.4

3 Windows Embedded POSReady 2009 is based on Windows XP SP3

\*Endpoint Security Agent software versions 25.12.2, 25.12.1, 24.9.x, and 23.10.1 support Windows endpoints only.

\*\*Endpoint Security 3.2 and later do not provide FireEye Intel to FireEye Endpoint Security Agents earlier than version 11.

**F:** Provides full support for the FireEye Endpoint Security Agent software features available in a target release, except for features listed in “FireEye Endpoint Security Agent Feature Support Exceptions” on page 2.

**NA:** The Endpoint Security Agent software version is not applicable (not supported) for the Windows, OS X, or Linux operating system version listed.

**P1:** Does not record registry events in lookback cache.

**P2:** URL monitoring events are not supported.

**P3:** Memory-related audits are not supported.

### FireEye Endpoint Security Agent Feature Support Exceptions

- Real-time indicator detection is not supported for agents running on Linux operating systems.
- ExploitGuard and malware protection are not supported for agents running on OS X and Linux operating systems.
- ExploitGuard is not supported on Windows Server operating systems for agent versions 24 or earlier.
- ExploitGuard is not supported on Windows Server 2003 or XP.
- Malware protection, including malware detection, MalwareGuard, quarantine, and remediation, is not supported for agents running on Windows Server 2003, XP, or Vista, or Windows agent versions 23 or earlier.
- MalwareGuard, a component of malware protection, is not available for FireEye Endpoint Security Agent versions 26 or earlier.
- Quarantine and remediation, components of malware protection, are not available for FireEye Endpoint Security Agent versions 25 or earlier.
- Memory-related audits are not supported for host endpoints running Windows 10 or Windows Server 2016.
- Some Endpoint Security features require specific versions of FireEye Endpoint Security Agent software. See the FireEye Endpoint Security Server User Guide and the FireEye Endpoint Security Agent Administration Guide for more details.

### Endpoint Security System Requirements

FireEye Endpoint Security Agent requires a 1 Ghz or faster Pentium-compatible processor and at least 300 MB of free disk space. It works with the following operating systems:

**Table 2.** Requirements for Windows operating systems.

WINDOWS OPERATING SYSTEM VERSIONS	MINIMUM SYSTEM MEMORY (RAM)
Server 2003 R2 SP2 (32-bit and 64-bit) XP SP3 (32-bit)	512 MB
Server 2016 (64-bit)	2 GB
Vista SP1 and higher (32-bit and 64-bit) Windows 7 and Win 7 SP1 (32-bit and 64-bit) Win 8 (32-bit and 64-bit) Win 8.1 (32-bit and 64-bit) Win 10 (32-bit and 64-bit)	1 GB (32-bit), 2 GB (64-bit)
Server 2008 (32-bit and 64-bit) Server 2008 R2, R2 SP1, R2 SP2 (64-bit) Server 2012 (32-bit and 64-bit) Server 2012 R2 (64-bit) Server 2016 (64-bit)	2 GB (64-bit)

**Table 3.** Requirements for MAC OS.

MAC OS VERSIONS	MINIMUM SYSTEM MEMORY (RAM)
Mavericks 10.9 (64-bit) Yosemite 10.10 (64-bit) El Capitan 10.11 (64-bit) Sierra 10.12 (64-bit) High Sierra 10.13 (64-bit) Mojave 10.14 (64-bit)	1 GB

**Table 4.** Requirements for Linux operating systems.

LINUX OPERATING SYSTEM VERSIONS	MINIMUM SYSTEM MEMORY (RAM)
RHEL 6.8+ (64-bit) RHEL 7.2+ (64-bit) CentOS 6.9+ (64-bit) CentOS 7.4+ (64-bit)	2 GB

#### About FireEye, Inc.

FireEye is the intelligence-led security company. Working as a seamless, scalable extension of customer security operations, FireEye offers a single platform that blends innovative security technologies, nation-state grade threat intelligence and world-renowned Mandiant® consulting. With this approach, FireEye eliminates the complexity and burden of cyber security for organizations struggling to prepare for, prevent and respond to cyber attacks.
