Introduction
Cyber security has never been more challenging. Almost daily, new threats expose companies’ vulnerabilities, forcing them to purchase more products and hire more talent. Such reactive approaches lead to escalating complexity — yet another vulnerability attackers can take advantage of. Security operations — big or small — require a holistic, foundational approach. FireEye Helix helps organizations build that foundation.

FireEye Helix is a cloud-hosted security operations platform that allows organizations to take control of any incident from alert to fix. Available with any FireEye solution, FireEye Helix integrates your security tools and augments them with next-generation SIEM, orchestration and threat intelligence capabilities to capture the untapped potential of security investments. Designed by security experts, for security experts, it empowers security teams to efficiently conduct primary functions, such as alert management, search, analysis, investigations and reporting.

What FireEye Helix Does

- **Threat Intelligence**: Detect, enrich, explore and learn about the latest intelligence threats.
- **Security Orchestration**: Automate response with pre-built playbooks created by frontline practitioners.
- **Workflow Management**: Organize, assign, collaborate and action steps through the investigative process through automated and manual workflows.
- **Next-Generation SIEM**: Improve threat and vulnerability detection with advanced user behavioral analytics.
- **Investigative Workbench**: Index, archive and search across alert and event data from all sources across the infrastructure to support flexible pivoting and fast hunting.
- **Compliance Reporting**: Use and customize dashboards and widgets to visually aggregate, present and explore the most important information.

Centralize security data and infrastructure

Detect security incidents by correlating data from multiple tools

Make informed and efficient decisions with contextual threat intelligence

How to Get the FireEye Helix Platform

FireEye Helix is available with the purchase of any FireEye subscription-based solution. It works across all FireEye technologies and integrates your installed base of non-FireEye security products. As your organization grows and changes, FireEye solutions can be reconfigured, added or upgraded without disrupting organizational operations.
