FIREEYE™

FireEye Helix Detect

Alert to Fix, Simplified

HIGHLIGHTS

- **Unified Protection:** Whether on premise or in the cloud, centralize security data and infrastructure with next generation SIEM for complete visibility into threats and vulnerabilities.

- **Easily Connect the Dots:** Automation of alert prioritization helps alleviate alert fatigue and allows security teams to be more efficient at reducing risk to your organization and data.

- **Comprehensive Coverage:** Detect advanced threats with integration for over 600 FireEye and third-party security tools, and overlay contextual threat intelligence and behavior analytics to deliver unparalleled situational awareness.

Introduction

Cyber security has never been more challenging. Almost daily, new threats expose companies' vulnerabilities, forcing them to purchase more products and hire more talent. Such reactive approaches lead to escalating complexity. Security operations — big or small — require a holistic, foundational approach. FireEye Helix helps organizations build that foundation.

Introducing Helix Detect

FireEye Helix is a SaaS security operations platform that allows organizations to take control of any incident from detection to response. FireEye Helix integrates disparate security tools and augments them with next-generation SIEM, orchestration and threat intelligence capabilities to capture the untapped potential of security investments.

Helix Detect is a new SaaS edition aimed at customers who want superior detection and response without the overhead of a full SIEM and SOAR. Helix Detect provides peace of mind to customers - protecting their business from the most advanced threats, including Ransomware, Phishing, and Targeted (APT), so they can focus on what matters most – running their business.

What FireEye Helix Detect Does

Detect security incidents by correlating data from multiple tools

Make informed and efficient decisions with contextual threat intelligence

Centralize security data and infrastructure

Threat Intelligence
Detect, enrich, explore and learn about the latest intelligence threats.

Response Playbooks
Automate response with pre-built playbooks created by frontline practitioners.

Includes 30 Days of Data Retention

Incident Correlations
Correlate alerts with machine learning to identify activities that suggest a high risk of insider threats, lateral movement or final-state attacks.

Detection and Analytics (UEBA)
Improve threat and vulnerability detection with advanced user behavioral analytics.

How to Get FireEye Helix Detect

FireEye Helix Detect is available for purchase through normal FireEye channels. It works across all FireEye technologies and integrates your installed base of third-party security products. As your organization grows and changes, FireEye solutions can be reconfigured, added or upgraded without disrupting organizational operations.
