Introduction
Cyber security has never been more challenging. Almost daily, new threats expose companies’ vulnerabilities, forcing them to purchase more products and hire more talent. Such reactive approaches lead to escalating complexity — yet another vulnerability attackers can take advantage of. Security operations — big or small — require a holistic, foundational approach. FireEye Helix helps organizations build that foundation.

FireEye Helix is a SaaS security operations platform that allows organizations to take control of any incident from detection to response. FireEye Helix integrates your security tools and augments them with next-generation SIEM, orchestration and threat intelligence capabilities to capture the untapped potential of security investments. Designed by security experts, for security experts, it empowers security teams to efficiently conduct primary functions, such as alert management, search, analysis, investigations and reporting.

About FireEye
FireEye is the intelligence-led security company. Working as a seamless, scalable extension of customer security operations, FireEye offers a single platform that blends innovative security technologies and nation-state grade threat intelligence. With this approach, FireEye eliminates the complexity and burden of cyber security for organizations struggling to prepare for, prevent and respond to cyber attacks.

What FireEye Helix Enterprise Does

### Threat Intelligence
Detect, enrich, explore and learn about the latest intelligence threats.

### Security Orchestration and Automation (SOAR)
Automate response with pre-built playbooks created by frontline practitioners.

### Workflow Management
Organize, assign, collaborate and action steps through the investigative process through automated and manual workflows.

### Next-Generation SIEM
Improve threat hunting and detection with advanced user behavioral analytics and quick search capabilities.

### User and Entity Behavior Analytics (UEBA)
Correlate alerts with machine learning to identify activities that suggest a high risk of insider threats, lateral movement or final-stage attacks.

### Dashboards and Reporting
Use built-in reports including compliance visibility and customize dashboards and widgets to visually aggregate, present and explore the most important information.

How to Get FireEye Helix Enterprise
FireEye Helix and Add-Ons are available for purchase through normal FireEye channels. It works across all FireEye technologies and integrates your installed base of third-party security products. As your organization grows and changes, FireEye solutions can be reconfigured, added or upgraded without disrupting organizational operations.

Helix Add-On Retention Options

#### Quick Search
Helix allows for 7-day quick search and for security analysts that need additional days for monitoring and hunting, we offer Helix customers the ability to upgrade to 16, 30, 60 or 90 days.

#### Long Term Storage
There are times due to compliance reasons or incident response requirements, data must be stored longer than the 13 months provided with Helix Enterprise. We offer Helix customers options for cold storage in 2-, 3-, 5- or 7-year increments.
