FIREEYE
INTELLIGENCE CENTER

FOUNDATIONAL INTELLIGENCE AND ANALYSIS

OVERVIEW

The FireEye Intelligence Center is an online portal that delivers foundational intelligence and is available in conjunction with FireEye products and services. It provides access to foundational intelligence, analysis tools, intelligence sharing capabilities and institutional knowledge. The FireEye Intelligence Center is powered by over 10 years of cyber security experience detecting, responding to and tracking advanced attacks.

Foundational Intelligence

Analytical reports include profiles on threat groups, regions, industries and malware. Threat Media Highlights, providing daily FireEye iSIGHT Intelligence perspectives on the latest open source cyber security stories, are published every business day. Coverage encompasses motivations and implications across industries and regions. This information provides subscribers with foundational intelligence, helping you to understand who is likely targeting your organization or industry and what tactics, techniques and procedures are being employed.

FIREEYE CENTRAL INTELLIGENCE HUBS	
Threat Groups	30+
Industries	15+
Regions	15+
Malware	700+

Analysis Tools

Designed for investigating real-time activity, Analysis Tools are built into the FireEye Intelligence Center portal and can help identify associated malware families, contextual information from our intelligence database, such as threat group attribution, whitelist and blacklist verifications and verification from anti-virus vendors who consider the file to be malware.

- **Analyze a Domain or IP Address** allows you to enter an IP address or domain to query our intelligence database. Results provide you with contextual information that we may have about associated threats. Such information can include threat group attribution and associated malware.

HIGHLIGHTS

- **Increase Security Analyst Efficiency:** Reduce the amount of time security analysts spend evaluating disparate information by providing them with insights, research and analysis tools in a single web-based interface.

- **Reduce Risk:** Focus on the threats that pose the highest risk and anticipate attacks based on detailed insights into attacker trends and tactics across your industry.

- **Develop a Proactive Security Posture:** Evaluate your security posture against threats and shift resources accordingly to protect against new threats and resolve security incidents.

- **Anticipate Attacks:** Understand which advanced attack groups are most likely to target your organization, what their objectives may be and how to respond.

- **Analyze a File** provides a malware analysis report that includes detailed static and dynamic analysis. You can use the analyze a file tool to upload suspect files for analysis. You will receive an analysis report to help you find the malware on other systems.

SIMPLIFY WORKFLOW WITH CENTRAL INTELLIGENCE HUBS

Designed by practitioners, the FireEye Intelligence Center is architected in a format conducive for precise and efficient research across multiple categories and sub-categories. The easy-to-navigate interface categorizes the intelligence into central intelligence hubs. These hubs organize all new and historical FireEye intelligence within 6 categories and dozens of sub-categories covering threat groups, industries, regions, malware, institutional knowledge and community threat intelligence.

REAL-TIME, ACTIONABLE INTELLIGENCE

FireEye Intelligence Center establishes thorough understanding of advanced threats by communicating:

- **Quality:** Well researched and written analytical products with thoughtful and defensible assessments
- **Timeliness:** Quick-turn products based on observed activity, with real-time intelligence
- **Uniqueness:** Analysis of threats not well-known or already covered by the security community
- **Usefulness:** Explains, interprets, predicts and displays complex threat activity in a meaningful way

WHY FIREEYE?

Technology. Intelligence. Expertise. FireEye protects the most valuable assets in the world from those who have them in their sights. Our combination of technology, intelligence and expertise — reinforced with the most aggressive incident response team — helps eliminate the impact of security breaches. With FireEye, you'll detect attacks as they happen. You'll understand the risk these attacks pose to your most valued assets. And you'll have the resources to quickly respond and resolve security incidents. The FireEye Global Defense Community includes more than 4,700 customers across 67 countries, including over 730 of the Forbes Global 2000.
