

Enterprise Platform Services

OVERVIEW

The Deployment and Integration Service for the Enterprise Platform focuses on deployment for midsize to large organizations with multi-site FireEye platform solutions. The Enterprise Platform deployment and integration solution enables customers to leverage FireEye technology in their production environment through repeatable delivery processes, best practice designs, testing, tools, methodology and knowledge transfer.

Our consultants are trained to implement and validate your FireEye technology investments and integrate FireEye solutions into your broader security infrastructure following a disciplined and structured approach.

Available in three packages, organizations can choose the deployment level that meets their needs.

Enterprise Starter Pack

The Enterprise Starter Pack is tailored towards organizations that have 7 to 12 FireEye appliances deployed in the environment and utilize 3 different appliance types across more than one location.

Enterprise Full Pack

The Enterprise Full Pack is tailored towards organizations that have more than 10 FireEye appliances deployed in their environment and utilize 3 to 6 different appliance types across multiple locations. These customers usually require a significant level of process and documentation to deploy the FireEye platform.

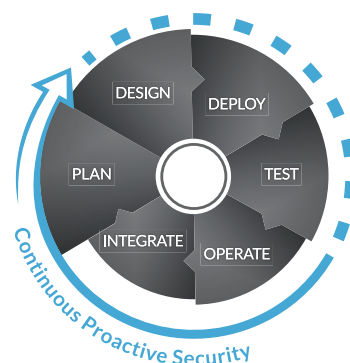

Enterprise Full Pack with FireEye as a Service

The Enterprise Full Pack is tailored towards FaaS customers that have more than 10 FireEye appliances deployed in their environment and utilize 3 to 6 different appliance types across multiple locations. These customers usually require a significant level of process and documentation to deploy the FireEye platform.

HIGHLIGHTS

- **Designed for enterprise customers:** Provide a range of services that surround an enterprise account.
- **Best-in-class services:** Delivered by industry experts focused on best practices and large engagement experience.
- **Customer enablement:** Provide the right level of expertise and knowledge transfer to enable your team to leverage the FireEye platform and defend against advanced threats.
- **Worry free installation:** Dedicated project management coordinating with the customer organization to manage the platform installation.

DEPLOYMENT AND INTEGRATION

Enterprise Platform Services overview

The Enterprise Platform Service is available at three service levels to meet your organization's deployment objectives.

Table 1.
